# Mini Track Drill ACCESS CAPABILITES

---

### Maneuverability

The mini tracks short width allows it to squeeze through openings that are 36" wide. It is an easy drill to track down side walks, through gates and around trees.

### Slopes

Depending on soil & weather conditions the track will go up 23 to 26 degree slopes. An 8000lb winch is mounted to the front of the drill for assistance.

### Walls

We carry ramps to move up and down small retaining walls or steep stairways.

### Stairs

The track is capable of going up and down stairs. Please note: The outside edge of the stairs could be damaged by the weight of the drill.

### Vertical Drops

The mini track weighs approximately 4000lbs and can be lifted to access vertical slopes by track hoe or boom truck.

*NW Excavating has moved the track 30' horizontally across the slope using their boom truck*
